

# FULMETAL REDIROLL

**G**lidevale Fulmetal RediRoll is an innovative universal dry fixed ventilated ridge and hip system. Manufactured entirely from aluminium, the Fulmetal RediRoll overcomes the durability and weathering problems associated with other fabric based roll ridge systems. RediRoll is rot proof and completely durable. The system is a continuous all aluminium design coloured to suit the roof covering. The unique weatherproof design of the roll removes the need for ridge unions, making Fulmetal RediRoll the only truly universal solution for ridges and hips.

The unique stainless steel clip between ridge tiles not only provides mechanical fixing of the ridge tiles but spaces them apart to ensure even appearance and ventilation provision even on flat tiles and slates.

## FULMETAL REDIROLL

### Benefits

- All aluminium construction
- Patented and with European registered design
- Durable corrosion resistant yet flexible solution for ridges and hips
- Ventilated and driving rain resistant
- Suits all tile profiles including all ridge and hip tile designs
- Quick and easy to install, no special tools required
- Available in Red, Brown and Anthracite
- Available in two widths 300mm and 350mm
- Handy 5m pack contains all components needed to install system

**Specification Clause**  
*Mechanically fixed dry ventilated ridge and hip.*  
 Provide mechanical fixing of ridges and hips to BS 5534: 2003 and high level roof ventilation by means of Glidevale Fulmetal RediRoll to suit any tile type on both ridges and hips.  
 Install continuously to provide ventilation area equivalent to 5,000mm<sup>2</sup>/m\* to comply with Building Regulations and BS 5250: 2002. Fix in accordance with manufacturer's recommendations, available from Glidevale Ltd, 2 Brooklands Rd, Sale, UK, M33 3SS, Telephone: 0161 962 7111 Fax: 0161 905 2085.

\*5,000mm<sup>2</sup>/m available on all flat and profiled tiles at hips and ridges. If plain wing angle ridges are used, it provides dry fix option only.
